

AMERICANS *for* TAX REFORM

Grover G. Norquist
President

March 12, 2008

Dear Legislator,

In light of the ongoing special session, I write to urge you to support Gov. Jindal's agenda to provide meaningful tax relief to Louisiana taxpayers. You have already acted swiftly to enact a first step toward positive reform by passing legislation to create a single searchable website detailing government expenditures and now, you are presented with the opportunity to serve taxpayers to a greater extent.

The measures outlined in Gov. Jindal's special session agenda present an excellent chance to boost the economy and job creation by cutting taxes on businesses and providing tax relief for families who chose to home-school their children or make use of private learning institutions.

Returning money to taxpayers will help fuel the engine of economic growth without setting the stage for budget shortfalls in future years.

Now more than ever it is imperative to keep the interest of taxpayers as the top priority. **By seizing this opportunity to cut taxes, you can demonstrate your commitment to taxpayers and to the economy of the Bayou State. Returning money to taxpayers' wallets will spark growth in the state economy and fuel business investment in the state.**

Louisiana has the chance to enter a new era of government run with the best interests of citizens in mind. I hope you will continue to make strides in reforming the structure and practices of Louisiana's state government- and be a part of this momentous change. I urge you to enact tax cuts during the special session, and enjoy the fruits of your labor in coming years as Louisiana rises to the top.

Onward,

Grover Norquist
