Conservative Groups to Conferees on Tax Cuts and Jobs Act: Reduce Corporate Income Tax Rate to 20 Percent

December 8, 2017

Dear Conferee,

The central pro-growth provision in the Tax Cuts and Jobs Act is reducing the corporate income tax rate from 35 percent to 20 percent. It is a primary reason for our enthusiastic support of tax reform. The United States currently has the highest corporate tax rate in the developed world - dropping that rate to 20 percent will spur American competitiveness, increase wages and deliver the relief middle-class taxpayers deserve.

The U.S. House of Representatives passed a tax cut bill with this exact rate cut. The U.S. Senate passed a tax cut bill with this exact rate cut. We strongly urge the conference committee to report a tax cut bill with this exact rate cut. We are confident that it will, and we write to encourage you in your good work.

Sincerely,
